

# SEVEX View™

The software for

## Emergency Planning & Realistic Risk Zone Mapping

## SEVEX View™

Integrated approach from hazard identification to practical mapping for emergency planners & responders

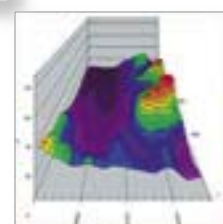

**The solution for**

Industries • Authorities • Consultants

Free download at [www.atmpro.be](http://www.atmpro.be)

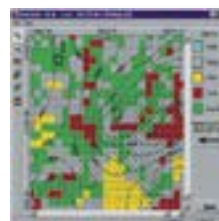

## Features

- > Complies with the EC SEVESO directives and US CAA 112 (r)
- > Integrates models to simulate leakage flow rates, jet, dense gas dispersion, rainout, pool formation & evaporation, 3D passive dispersion, VCE, BLEVE
- > Uses an optimized 3D meteorological & dispersion model
- > Takes into account topography & land use (complex terrain)
- > Includes a comprehensive chemical compounds data base
- > Produces realistic danger zones mapping
- > Maps ready-to-use infos for emergency planners & responders
- > Uses conservative assumption and manages uncertainties
- > Is tested and validated extensively
- > Is needed for effective emergency crisis management
- > Increases efficiency
- > Enables life, time and money savings

## Visualization

- > 3D Terrain, with complete 3D control
- > 3D wind field with topography contours and land use information
- > Risk areas location on base maps
- > Final report and hazard zone mapping

## Services

- > Courses
- > Tailored consulting services
- > Help in the conception of emergency plan
